DIV. OF OIL, GAS & MINING

### APPLICATION for Site and/or Bond Release

**Operator/Permittee:** Allroc Fine Aggregates, LLC

**Mine Project Name:** Black Rock Quarry,

**File Number:** M/027/0088, Millard County, Utah

**Operations:** Small Mine

**Release:** Partial Release of entire mine site: (Backfilling and grading will be completed by July 23, 2013).

Total acreage to be released - 6.05

**Amount of Existing Surety:** \$17,315.72 (DOGM)

**Amount of Existing Surety requested for release:** \$15,000.00

**Reason For Bond Release Request:** All operations at the Black Rock Quarry were terminated in September of 2012. All equipment has been removed from the site and the site has been cleaned of any debris. The site will have been backfilled and graded by July 23, 2013 completing all reclamation requirements exclusive of seeding. DOGM has advised the operator that seeding should take place in the fall to which the operator has agreed. The surety amount proposed to be withheld is to cover seeding.

The money to be released will not be used as surety for future disturbances.

### DESCRIPTION OF RECLAMATION ACTIVITIES COMPLETE

There were no wells or shafts on the property.

Disposal of debris & other materials incident to mining:

All equipment incident to the crushing, screening and storage of the fine aggregate material mined has been removed. The site has been thoroughly cleaned of any debris & other materials incident to mining.

Drainages, reestablished & stable: All drainages have been reestablished and are stable.

Structures demolished/removed: All structures have been removed. Cement foundations for the crusher have been demolished and buried as previously agreed to between the operator, BLM and DOGM.

Regrading Completed - Slopes, pits, highwalls in stable condition: All grading will be completed by July 23, 2013 and the only existing highwall is in stable condition.

Meets Postmining Land Use (indicate land use): The postmining land use is restoration to high desert mountain terrain for utilization by wild life.

Roads Reclaimed: The access road has been scarified for planting.

Dams, Impoundments, Ditches, Pits reclaimed: The site had not preexisting dams or ditches and no pits. The small excavation for rock removal and the equipment site have been reclaimed and contoured conducive to site reclamation.

Topsoil respread: Topsoil saved on site will have been respread in the crushing and screening plant site by July 23, 2013.

Erosion Controlled: Grading has been consistent with erosion control and any future erosion has been eliminated or is strictly minimal.

Vegetation: Will be accomplished in the late fall to secure optimum seed retention and growth. After one year growing season the operator will seek final settlement on all bond retention where the activities were conducted as a small mine operation.

I hereby certify that I am a responsible official of the applicant and that the information contained in this application is true and correct to the best of my information and belief in all respects with the laws of Utah in reference to commitments and obligations, herein.

Jerry Mansfield - Geologist  
BLM Fillmore Field Office  
35 East 500 North  
Fillmore, UT 84631

Please find enclosed a completed DOGM form MR-Site/Bond Release for the Black Rock Quarry, operated by Allroc Fine Aggregates LC. (M/027/0088 small mine plan covering 6.05 acres - under mineral sales contract with the BLM).

I am advising you that all reclamation will be completed at the Black Rock quarry by July 23, 2013. This work would have been accomplished much earlier but our D8 Dozer was found to require significant engine work and will not be available until the 18<sup>th</sup> of July. It is respectfully requesting that you expedite the release of \$15,000.00 of the existing DOGM bond of \$17,315.72 while retaining \$2,315.72 to assure seeding in the fall. In addition BLM is holding unused and refundable funds in the amount of \$1250.00 in relation to the mineral sales agreement.

I would also request that any site inspections be completed before July 26, 2013 so as to expedite the bond release where significant amounts have been expended in equipment removal and site reclamation and it would be helpful to the operator if a portion of these expended funds could be recovered as soon as possible.

DATED this 28<sup>th</sup> day of June, 2013

Allroc Fine Aggregates, LC
